

## Radak Power Controller II Series Rack Mount Kit

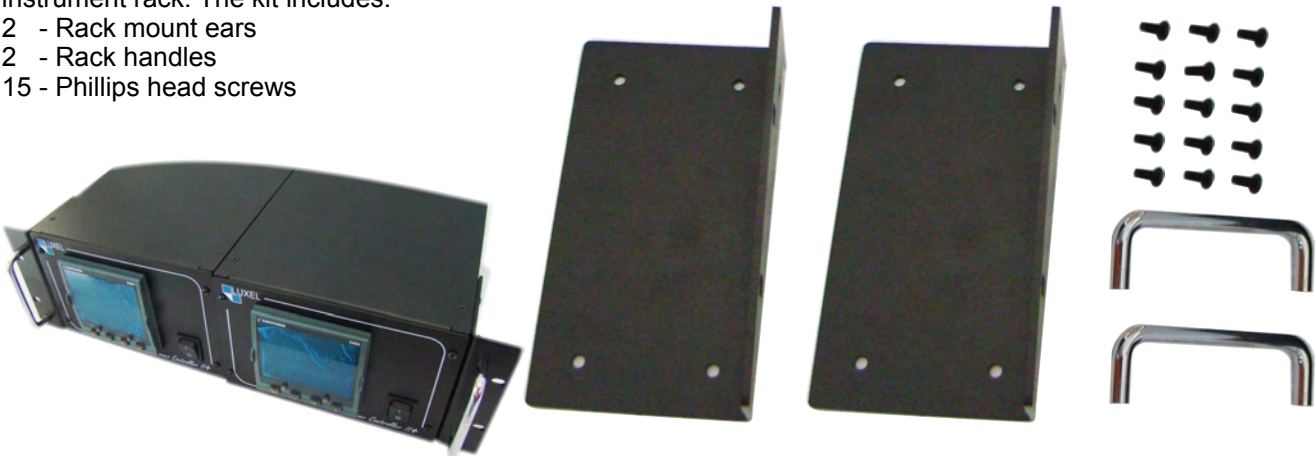

## Dual Controller Rack Mount Kit - 42021

Used for mounting two controller cases side by side in a standard 19" instrument rack. The kit includes:

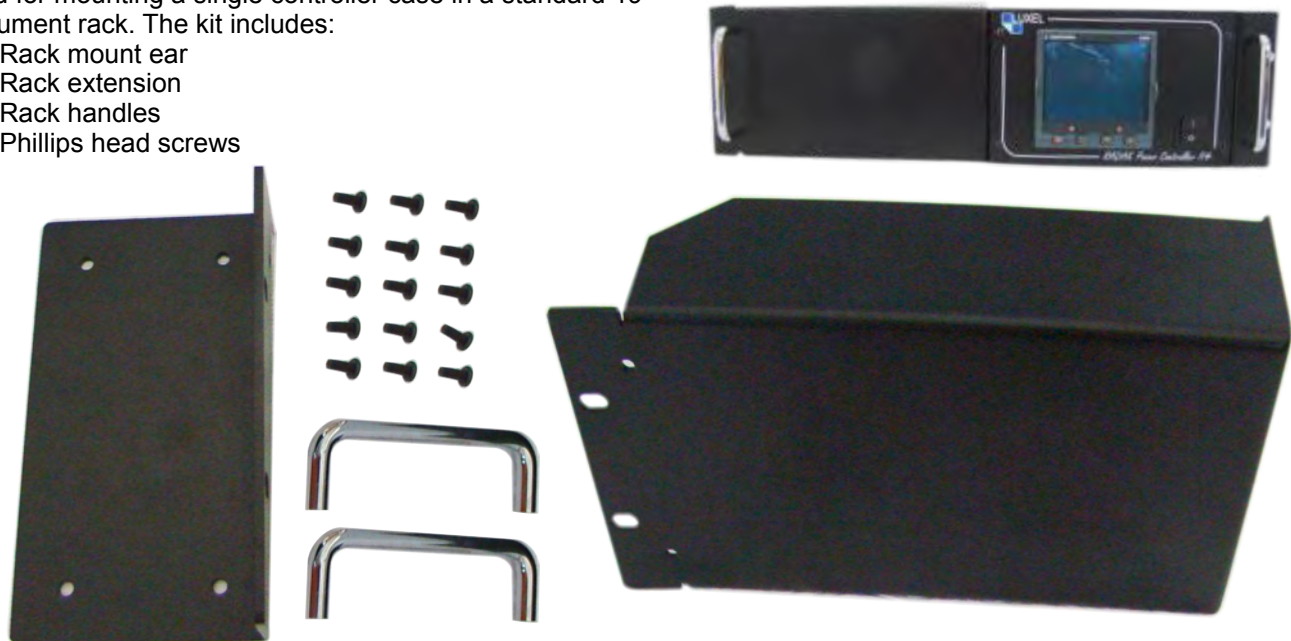

- 2 - Rack mount ears
- 2 - Rack handles
- 15 - Phillips head screws

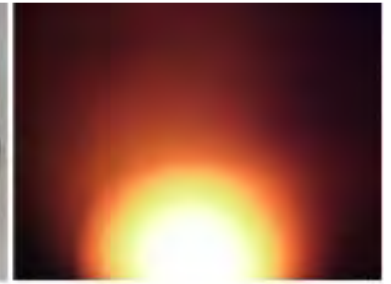

## Single Controller Rack Mount Kit - 42022

Used for mounting a single controller case in a standard 19" instrument rack. The kit includes:

- 1 - Rack mount ear
- 1 - Rack extension
- 2 - Rack handles
- 15 - Phillips head screws

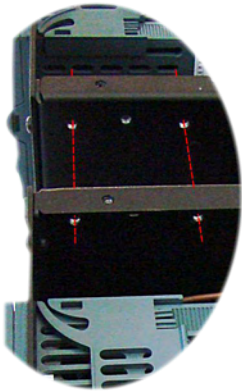

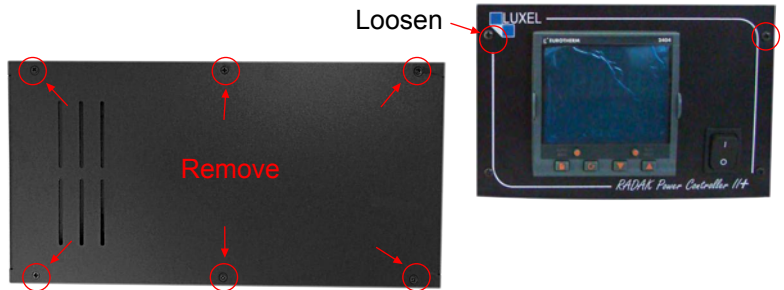

## Joining Two Controllers

Note: when installing the rack extension it is not necessary to remove the controller cover, please skip to the next section.

To mount two controllers side-by-side, remove the six controller cover screws. If the controller cover cannot be easily removed, it may be necessary to loosen the top two screws on the front and back panels.

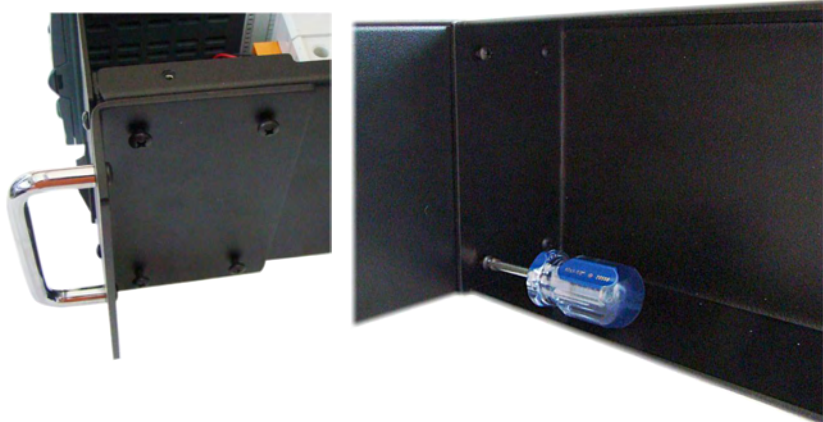

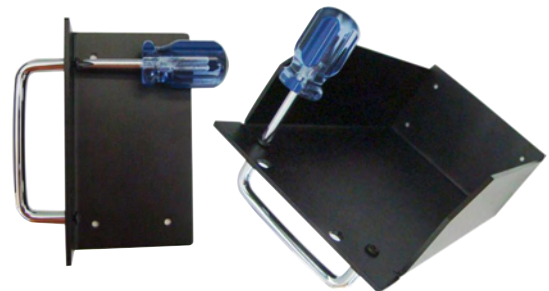

Align the two controllers and join them with three Phillips screws as shown.

## Adding The Rack Mount Ears/ Rack Extension

Using a Phillips screwdriver and four Phillips screws, attach two rack mount handles to either two rack ears, or one rack ear and one rack extension.

Using a Phillips screwdriver and four Phillips screws, attach either the rack ear or rack extension to the sides of the controller(s).

Replace the controller covers and cover screws if removed previously. Tighten front and back cover screws as applicable.
